Project Initialization and Planning Phase

Date	01 October 2026
Team	SWTID-2026-2949
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A service desk agent handling new tickets.	Quickly categorise and route each ticket to the right team.	Tickets arrive with vague descriptions and wrong or missing categories.	Classification is done manually and depends on individual judgement.	Overwhelmed and worried about missing SLAs.
PS-2	An employee raising an IT ticket.	Get my issue acknowledged and fixed quickly by the right team.	My ticket is bounced between teams and I get no response for hours.	I don't know which category to pick and the ticket is misrouted.	Frustrated and uncertain about the status.
PS-3	A team lead / dispatcher managing support	Keep queues balanced, meet SLA targets and	Tickets pile up unassigned and category	There are no standard routing rules and triage is	Pressured and unsure about the data.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
	queues.	get reliable reports.	data is inconsistent.	manual.
