Demonstration of Proposed Features

Date	01 October 2026
Team ID	SWTID-2026-2949
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Automatic Ticket Trigger	Automatically triggers the Flow Designer workflow when a new support ticket is created.	Implemented	Yes	Workflow starts automatically for newly created tickets.
2	Ticket Data Extraction	Reads important ticket information such as short description, category, priority, and other relevant fields.	Implemented	Yes	Required ticket details are captured by the flow.
3	Automatic Ticket Classification	Classifies the ticket based on the defined classification rules and available ticket information.	Implemented	Yes	Tickets are classified automatically without manual selection.
4	Category and Assignment Update	Updates the appropriate category and assignment details based on the classification result.	Implemented	Yes	Classification results are reflected in the ticket fields.
5	Flow Designer	Uses Flow	Implemented	Yes	The complete

	Automation	Designer actions and conditions to automate the complete ticket-classification process.			automation flow was configured and tested.
6	Classification Result Verification	Verifies the final ticket values after the flow completes and confirms that the expected classification was applied.	Implemented	Yes	Test tickets were used to verify the final results.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
