Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., Employee, Support Group).
Rectangle with numbered header	**Process**	An activity that transforms incoming data into outgoing data (e.g., Create Incident, Classify Ticket).
Rectangle (solid fill, no number)	**Data Store**	A place where data is held for later use (e.g., Incident Table, Classification Rules).
Labeled arrow	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram for the Auto Ticket Classification using Flow Designer project.
